

# Climate change data

*High value climate data to understand, act, and adapt.*

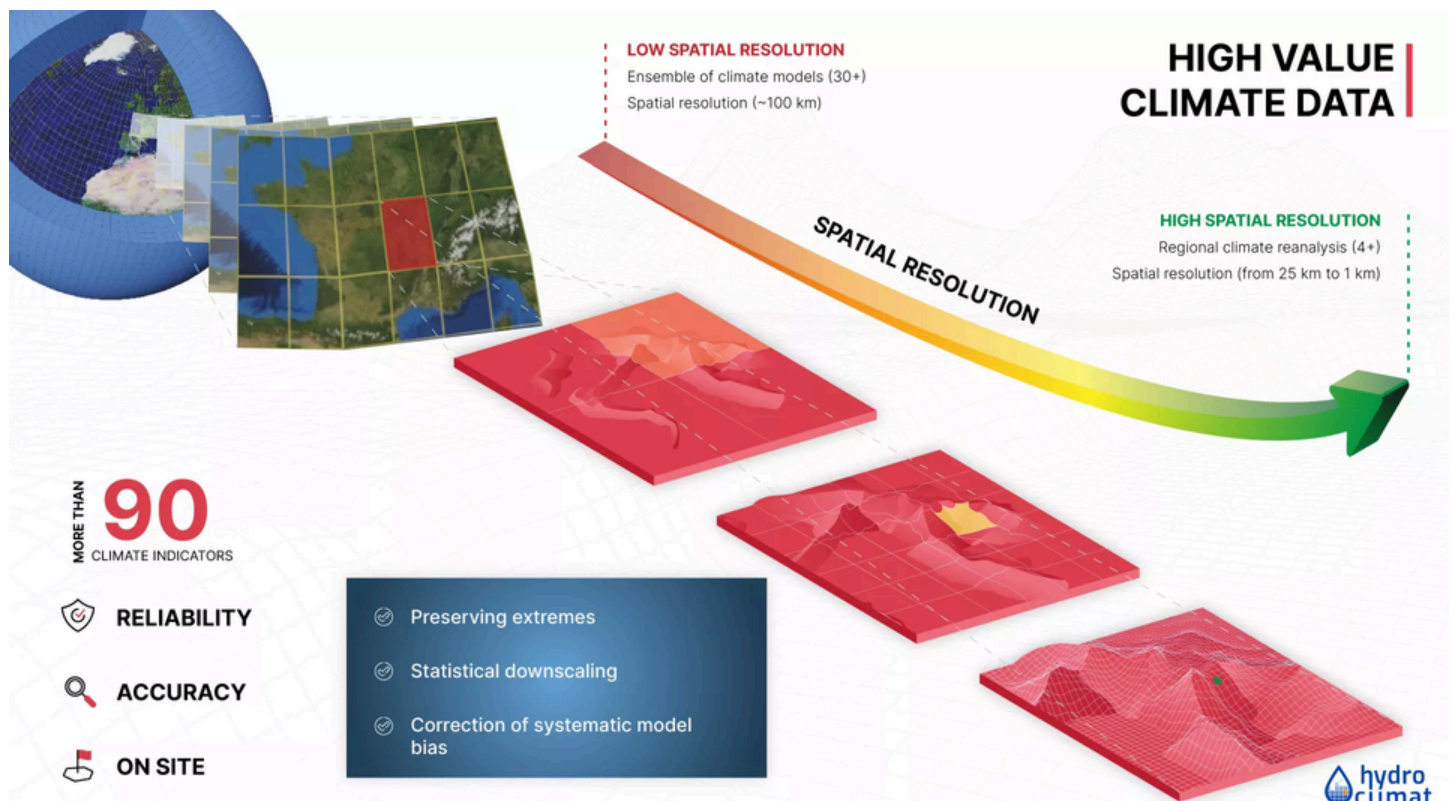

## Why us ?

Hydroclimat is a committed company, fully aware that every structure or territory is exposed to physical climate change risks. Our mission is clear: to minimize the impacts of climate change on the economic performance of your activities by providing tailored support and high-quality, accurate data that meets both regulatory requirements (CSRD, TRACC, EU Taxonomy) and the strategic needs of your business.

## Sectors we support

Climate data is designed to meet the needs of a wide range of stakeholders facing climate-related challenges. We support, among others, local authorities, financial and insurance actors, infrastructure managers and engineering firms, farmers and agri-food sectors, as well as water management operators.

## How we do it

# Climate change data

## What we offer

### Qualified climate projections

Different variables and spatial resolution

### Climate indicators & regulatory compliance

TRACC (FR) / PNACC (FR)  
CSRD (EU) / EU taxonomy  
Sizing

### Climate score

Impact of a climate indicator on a defined environment

## The benefits offered by our service

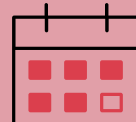

### Geographic coverage

France, Europe and International

### Future horizons

Flexible between 2025 et 2100

### Reference periods

Flexible between 1971 et 2014

### Very high spatial resolution

Up to 30 m or site specific

### Climate model

Bias-corrected CMIP6 models

### Climate scenarios

SSP1-2.6 (+1.8°C), SSP2-4.5 (+2.7°C), SSP3-7.0 (+3.9°C), SSP5-8.5 (+4.4°C)
